DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to an isolated nucleotide sequence encoding a polypeptide having 1-FFT activity and constructs and plants transformed therewith, classified in class 800, subclass 278 for example.
- II. Claims 17-30, drawn to an isolated nucleotide sequence encoding a polypeptide having 1-SST activity and constructs and plants transformed therewith, classified in class 800, subclass 298 for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are an isolated polynucleotide encoding a polypeptide having 1-FFT activity and plants transformed therewith of Group I, and an isolated nucleotide sequence encoding a polypeptide having 1-SST activity and plants transformed therewith wherein the isolated polynucleotides of Groups I and II have different structure from each other and encode polypeptides with different function.

Art Unit: 1638

The claims are directed to 3 independent and distinct nucleic acid encoding 3 amino acid sequences. Applicant is required to elect a single nucleic acid sequence (SEQ ID NO: 1, SEQ ID NO: 3 or SEQ ID NO: 5) and the corresponding amino acid sequence (SEQ ID NO: 2, SEQ ID NO: 4 or SEQ ID NO: 6). This requirement is not to be construed as a requirement for an election of species, since each of the nucleic acid sequences or amino acid sequences recited in alternative form is not a member of a single structurally and functionally related genus, but rather constitutes an independent and patentably distinct invention. Separate searches and considerations would be required for examination of each of the nucleic acid sequences.

Because the inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classifications, recognized divergent subject matter, and because the search required for one of the groups is not required for another restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
